

BURAN 500 & 1200 3IN1 SURVEILLANCE DEVICE (GSM audio bug + HQ voice activated recorder + GPS locator*)

The BURAN series of GSM audio listening device and HQ voice recording device is a combination of audio spy GSM listening device and HQ voice recorder in one housing.

Premium audio recorder with voice activation and long battery life combined with GSM audio listening device with top MEMS microphone included in only one housing, minimal dimensions.

The BURAN series of covert listening devices are also built into a plastic carbon housing to which can be added strong neodymium magnets for easy attachment to metal surfaces.

Black box design without any indications and CODED USB data cable, makes it impossible to access recordings or to charge a battery, what makes this eavesdropping audio device remarkably discrete.

All BURAN series of audio eavesdropping listening devices can be equipped with super strong neodymium magnets or an external microphone of your choice.

FEATURES OF GSM LISTENING MODULE (BURAN 1200 & BURAN 500) :

- * **ADMINISTRATOR NUMBER** - only you can manage the device and listen to trough. Calls from non-admin numbers are not possible.
- * **SLEEP MODE**- a battery saver mode in which the battery can last for 400hours on standby. The device shuts down all unnecessary processes and optimizes for minimal battery consumption.
- * **DEEP SLEEP MODE** - remotely switching off and on the device at a predefined schedule, allows the device to shut itself down without consuming battery power at a time when you do not need it, and to restart at the time you have defined. 6 Months is battery lifetime in deep-sleep mode.
- * **3D MEMS** microphone - low noise microphone adapted for use in GSM communication.
- * **GPS** locating - The device has the ability to locate via GPS (only BURAN 1200) and LBS base stations.
- * **SOUND ALARM** - If you turn on this feature, the device will activate and alert you if it receives sound in the room.
- * **VIBRATING ALARM** - If you turn this feature on, the device will alert you if it shakes.
- * **NANO SIM**- device uses the smallest NANO sim card of any operator.

FEATURES OF VOICE RECORDER MODULE (BURAN 1200 & BURAN 500):

- * **POWER SLEEP** technology, saving the battery when there are no conversations;
- * **MP3** recording format (48kHz sampling freq.);
- * **Coded USB** cable for PC connection (without the original coded cable is impossible to read out the recording);
- * **BLACK BOX** design (no label on the device);
- * **VOICE ACTIVATION** with adjustable 5 steps voice activation level, and recording quality via special PC software;
- * **ALC** function allows the whisper and loud conversation to be heard excellently;
- * **Each** recording is in a separate file, which makes the listening simple and clear.

DIFFERENCES IN DIMENSIONS, BATTERY DURATIONS AND LOCATING METHODS BETWEEN BURAN MODELS:

	BURAN 500	BURAN 1200
DIMENSIONS	47X23X18 mm	50x35x25 mm
BATTERY TYPE	LiIon 500mAh RECHARGABLE	LiIon 1200mAh RECHARGABLE
LOCATION FUNCTION	LBS ONLY	GPS AND LBS
EXTERNAL MIC	POSSIBLE ON REQUEST	POSSIBLE ON REQUEST
RECORDING (GSM OFF)	75 HOURS	150 HOURS
RECORD SLEEP (GSM OFF)	1800 HOURS	4000 HOURS
GSM LIVE (REC OFF)	5 HOURS	10-15 HOURS
GSM STANDBY (REC OFF)	200 HOURS	400 HOURS
GSM DEEP SLEEP (REC OFF)	3 MONTHS	6 MONTHS
