H.264-1080P Remote Wireless Camera
Operating Instructions

Thank you for having chosen this product. This camera adopts a unique ultra-portable design, which enables it to be applied in various fields and brings you convenient, safe and colorful daily life. Please follow the steps in the instructions to set up your camera correctly.

1. Press the ON/OFF key to turn on the camera. Press the ON/OFF key for 3 seconds to turn it off.

(When the camera is on, you may press Reset for 5 seconds to restart the camera for factory settings)

I. Mode represented by key indicator

Red light is power indicator, which is always on when the power is on.

Blue light is WIFI indicator.

Specific mode is as follows:

1. Point-to-point mode: Blue light flashes slowly

2. Configuration of remote camera completed: Blue light is always on

If you are not clear what mode it is, reset the camera and switch to point-to-point mode.
Note: This reset works only when the blue light is always on or flashes slowly. Press the Reset key for about 5 seconds until the indicators all go out, and let go until the camera starts (about 30 seconds).

II. Download APP software
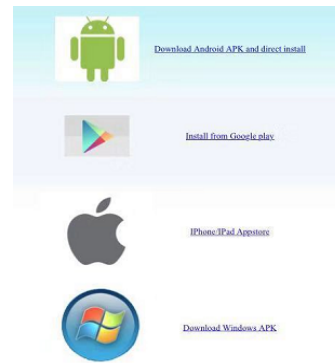

(Figure 1)

(Figure 2)

Method 1. Scan the QR code (Figure 1), and enter the download page (Figure 2). Choose to download the software according to the system of the mobile phone. Download and install the computer client through the download address

http://lookcam.ffvv.xyz:8800/lookcam_download.html

Method 2. For Android, search for APP software called LOOKCAM on Google Play, and download and install it.

For Apple, search for APP software called LOOKCAM in App Store, and download and install it.

Note: If you scan with WeChat, when (Figure 2) appears, click the browser in sharing in the upper right corner to open and download the software.

After downloading and installing, the following icon appears on the

mobile phone

III. Point-to-point connection of mobile phone to camera

Enter the mobile phone WI-FI settings, find the WiFi account (UID number) and connect. As shown in the figure

V. Specifications and parameters

Reminder: What Micro SD Card is required for recording? Why can't I

use my Micro SD Card for recording? The camera supports

up to 128 GB Micro SD card. Please use High Speed Class

10 FAT formatted memory card. You must format the Micro

SD before using. If SD card is not recognized when

inserted into camera, just remove and re-insert.

Why can't the camera go online?

1. Powerless.

2. Check if your router is working properly or not.

3. Weak Wi-Fi signal.

4. Wrong password wrong while Wi-Fi setting

Why is remote monitoring not smooth? You should choose

a suitable resolution to watch according to your internet

speed.

Why I can't save to my SD card? SD Card must be

formatted if this is your first time to use it.

How do I when I forgot my password? Press reset key for

10 seconds and restore the factory setting.

5. The initial password for each camera is 123456. Please change the

password to ensure the security of your camera.

6. If the camera cannot be connected to the router, please reset, and

connect the hot spots before completing the configuration.
